

Connection Technology

Tank accessories

Our tank accessories offer very compact and reliable solutions to connect e.g. tank to suction pump. The available sizes can be optimized with our given options to your application. On request we offer our valves in different materials with the same design benefits.

- **Cast steel / Aluminum / Stainless Steel**
- **most compact valve**
- **locking pins**
- **turnable actuating direction**

Just let us know how we could support you on a project!

The asa butterfly flange with SAE and DIN connections allows the combination with an elastic element (rubber compensator) to make a short compensating and economical connection with the pump port. The lever position can be changed through our new mechanism. The handle direction (clockwise or counter clockwise) can be changed by turning the switch bracket. Please note that the butterfly flange may only be opened in mounted state and with greased or lubricated sealing. The adapter flange may only be welded with demounted butterfly flange.
