

Connection Technology

Vibration Absorbers

asa stands for developments, advances and innovations already at work through our customers' various mobile and stationary applications. More than 35 years experience in thermal systems, connection technology and pumps has made us a global leader in advanced technologies. Our experience creates progress to ensure you competitive pricing, consistent product performance and reliability. asa's global capacities follow worldwide standards, confirmed by successful ISO 9001 quality management and client audits. The modular design and patented solutions of our products offer many advantages for customizing the product to your application.

Rubber Vibration Absorbers included load assembly system

benefits: high shear loads
 functions: vibration absorber
 applications: connecting machine parts,
 motor support, ...
 options: stainless steel metal
 sizes: 4 sizes up to 1500lb, loads

- up to 6,500 lbs
- high duration
- real shear load capabilities
- excellent vibration absorbing
- temperature resistances up to 570°F

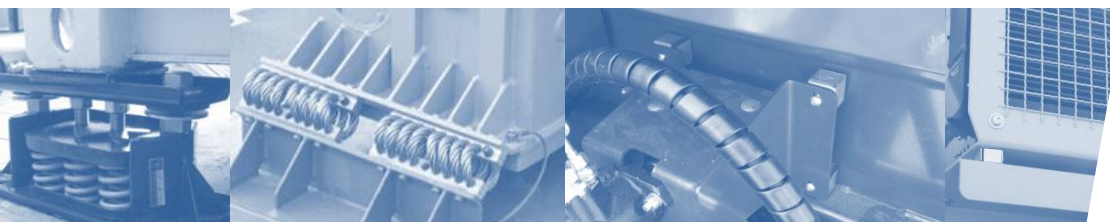

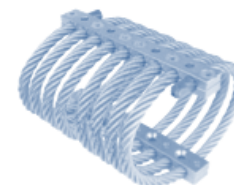

Product Announcement Spring Absorbers heavy duty support

benefits: high loads and life time
 functions: vibration absorber
 applications: large industrial supports
 options: corrosion protection
 sizes: tbc

Product Announcement Wire Rope Absorbers marine standards

benefits: flexible connection design
 functions: vibration absorber
 applications: marine supports, switch cabinets, ...
 sizes: tbc
